WiZ

CONNECTED

WiZ is a safe and easy-to-use smart lighting system based on your Wi-Fi network. WiZ will allow you to personalize your home lighting in a few simple steps.

JUST SCREW AND USE

1. Screw in the bulb or install the luminaire

2. Install the WiZ app on your phone, the light will work on your home Wi-Fi network

3. Control as you like

THREE RANGE OF PRODUCTS

WHITE LIGHT DIMMED

Products in this range shine with a soft and warm white light. You can dim and brighten them freely, so that the lighting is always tailored to your needs.

WHITE LIGHT FROM COLD TO WARM WHITE

The bulbs and luminaires in this range allow you to choose from many shades of white light, from energizing and cool to warm and cozy.

LIGHT COLORS

This product variant consists of luminaires and light bulbs with 16 million different colors that will help you create an amazing atmosphere.

ECOSYSTEM WiZ

WiZ Connected is a smart lighting system that provides easy-to-use and network-based Wi-Fi light.

All products based on the WiZ ecosystem are compatible with each other. Therefore, WiZ products will work with Philips Smart LED bulbs, which are also based on the WiZ system.

Thanks to Wi-Fi technology and the WiZ application, you can easily control your light and adapt it to the activity you perform, the time of day or your lifestyle.

SPACESENSE

The latest WiZ SpaceSense technology allows you to turn light bulbs into motion sensors. Based on the Wi-Fi signal, the system uses the network signals present in a given room and its subtle interference caused by the presence of people. SpaceSense makes WiZ react instantly to your every move, turning on when you enter a room and turning off when you leave.

With two or more WiZ or Philips Smart LED lamps or bulbs in the room, you can activate SpaceSense in the WiZ app and the lights will turn on and off automatically when motion is detected. You can adjust the function, for example, to prevent your dog or cat from turning on the lights.

SpaceSense works with the latest Bluetooth compatible WiZ and Philips Smart LED products. Look for the Bluetooth logo on the package.

With no additional sensors or other special hardware required, SpaceSense is very easy to set up.

Set up lighting throughout your home and enjoy the convenience only WiZ can provide.

THE PERFECT LIGHT AT YOUR REACH

Control your lights from anywhere, even outside your home

Use ready-made lighting modes and create your own scenes

Program your lights to match your daily activities

Enjoy automatic light adjustment to the time of day

Grant access to the system to selected household members, guests and friends

Simulate your presence in the house with light when you are away from it

Control the light with the voice function

Monitor the power consumption of your WiZ lighting

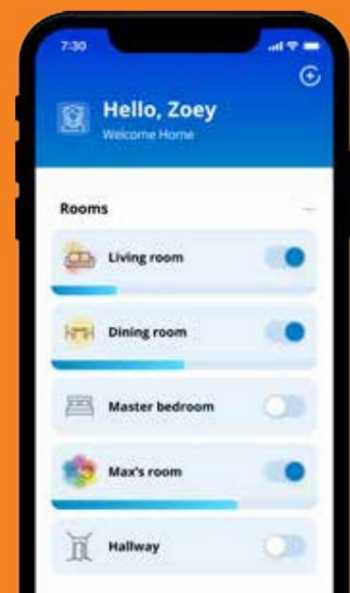

WiZ RESPECTS YOUR PRIVACY

The privacy and security of your data is as important to us as it is to you.

The WiZ app allows anonymous login; never requires a phone number, email address or other personal information.

All your information remains private. 100% comfort, no worries!
